Notes from this run

- asset 10.20.1.7/32 of team 'reporting' overlaps 10.20.0.0/16 of team 'payments'

Teams (5)

One report was produced per team. *Own* counts the rules written for that team's address space; *also covers* the estate-wide ones that include them without being theirs, which carry no findings in a team's report.

TEAM	CONTACT	NETWORKS	INBOUND	OUTBOUND	OWN TOTAL	ALSO COVERS	FINDINGS
Platform Services	platform@example.com	2	15	14	69	9	67
Payments Platform	payments@example.com	2	3	10	53	5	61
DMZ Operations	dmz@example.com	1	3	10	20	10	18
Development	dev@example.com	1	3	10	20	10	18
Reporting Service	reporting@example.com	1	0	0	2	14	2

Rules without an owner (1)

Almost always a sign that the asset inventory is incomplete rather than that the rules do not matter. This list is the best guide to what the inventory is still missing.

RULE	LOCATION	SOURCE	DESTINATION	SERVICE	TICKET
shared-deny-all	shared/post	any	any	any	

All findings (122)

SEVERITY	FINDING	RULE	LOCATION	DETAIL
HIGH	Permits any source to any destination ANY_ANY	development-pre-04	DG-Development/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	development-pre-15	DG-Development/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	dmz-pre-04	DG-DMZ/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	dmz-pre-15	DG-DMZ/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	partner-pre-04	DG-Partner/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	partner-pre-15	DG-Partner/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	production-pre-04	DG-Production/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	production-pre-15	DG-Production/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	shared-services-pre-04	DG-Shared-Services/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
HIGH	Permits any source to any destination ANY_ANY	shared-services-pre-15	DG-Shared-Services/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.
