How to read this report

This report contains two kinds of rule, and only the first is a question to you.

- **Your rules** — written for your address space: the rule names one of your networks, or carries your team's tag or zone. You are the one who can say whether they are still needed.
 - **Inbound** — other systems may reach yours. These are your exposure.
 - **Outbound** — your systems may reach elsewhere.
 - **Both ends yours** — source and destination are both networks of yours.
 - **No direction** — attributed by tag, name or device group, which does not say which side you are on.
- **Rules that also cover your networks** — estate-wide rules that happen to include you: ping, DNS, Active Directory. Nothing is being asked of you here; they are listed so you can see the access you already have, and object if one of your systems must not have it.

Rules appear in the order the firewall evaluates them, grouped into the blocks it evaluates as a unit; the first matching rule wins. Addresses are the result of resolving address objects and groups. Object names are given so they can be cited in a change request. Questions about a rule, or need one changed? Raise a ticket with the firewall team and quote the rule name and its location.

Usage data not included. Rule hit counters are runtime state and are not contained in a configuration backup. This report therefore makes no statement about whether a rule is used. Hit counts can be collected separately via the optional enrichment module.

Your networks (2)

What this report considers yours, and how many of your own rules touch each. Everything else follows from this list, so a wrong entry makes the rest wrong in the same way.

NETWORK	SYSTEM	INBOUND RULES	OUTBOUND RULES
10.10.0.0/16	Platform network	15	14
10.10.1.5/32	srv-platform-01 (shared services jump host)	8	10

Objects and groups inside your networks (48)

What your networks are called in the firewall. Every address object and group whose addresses lie entirely within your networks — these are the names to quote when you ask for a rule to be changed, and the names you will see in the rules below.

NAME	KIND	DEFINED IN	COVERS	DESCRIPTION
dag-partner-owned	group	DG-Partner	10.10.1.5/32, 10.10.1.9/32, 10.10.1.13/32, 10.10.1.17/32, 10.10.1.21/32	Dynamic group matching 'owner:payments'

Your rules (69)

Written for your address space. These are the ones to decide on.

Inbound — who reaches your networks (15)

Traffic from elsewhere that is permitted to reach the networks you own.

POS	RULE	YOUR NETWORKS	OTHER SIDE	SERVICE / PORTS	APPLICATION	TICKET	FINDINGS

Cleanup candidates (67)

Findings on your own rules only, most significant first. Rules that merely cover your networks are maintained by the firewall team and are not listed here.

SEVERITY	FINDING	RULE	LOCATION	DETAIL	SUGGESTED ACTION
HIGH	Past its stated expiry date EXPIRED_RULE	development-pre-08	DG-Development/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Past its stated expiry date EXPIRED_RULE	dmz-pre-08	DG-DMZ/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Past its stated expiry date EXPIRED_RULE	partner-pre-08	DG-Partner/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Past its stated expiry date EXPIRED_RULE	partner-pre-19	DG-Partner/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Past its stated expiry date EXPIRED_RULE	production-pre-08	DG-Production/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Past its stated expiry date EXPIRED_RULE	shared-services-pre-08	DG-Shared-Services/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
HIGH	Permits any source to any destination ANY_ANY	shared-services-pre-15	DG-Shared-Services/pre	Both source and destination are 'any', so this rule allows traffic between all systems the firewall sees.	Restrict at least one side to the address objects actually needed.
HIGH	Past its stated expiry date EXPIRED_RULE	shared-services-pre-19	DG-Shared-Services/pre	The description gives an expiry of 2026-06-13, 52 days ago, but the rule is still active.	Remove the rule, or extend it with a new change reference.
MEDIUM	Source is 'any' ANY_SOURCE	development-post-02	DG-Development/post	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Source is 'any' ANY_SOURCE	development-pre-02	DG-Development/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	development-pre-14	DG-Development/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	dmz-post-02	DG-DMZ/post	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Source is 'any' ANY_SOURCE	dmz-pre-02	DG-DMZ/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	dmz-pre-14	DG-DMZ/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	partner-post-02	DG-Partner/post	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.

SEVERITY	FINDING	RULE	LOCATION	DETAIL	SUGGESTED ACTION
MEDIUM	Source is 'any' ANY_SOURCE	partner-pre-02	DG-Partner/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	partner-pre-03	DG-Partner/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	partner-pre-13	DG-Partner/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	partner-pre-14	DG-Partner/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	production-post-02	DG-Production/post	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Source is 'any' ANY_SOURCE	production-pre-02	DG-Production/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	production-pre-14	DG-Production/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	shared-allow-dns	shared/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Source is 'any' ANY_SOURCE	shared-services-post-02	DG-Shared-Services/post	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Source is 'any' ANY_SOURCE	shared-services-pre-02	DG-Shared-Services/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	shared-services-pre-03	DG-Shared-Services/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	Source is 'any' ANY_SOURCE	shared-services-pre-13	DG-Shared-Services/pre	Any system reaching this firewall may use this rule to access the listed destinations.	Restrict the source to the networks that legitimately need this access.
MEDIUM	Destination is 'any' ANY_DESTINATION	shared-services-pre-14	DG-Shared-Services/pre	The listed sources may reach any destination through this rule.	Name the destinations this access is meant for.
MEDIUM	No service or application restriction ANY_SERVICE	shared-services-pre-15	DG-Shared-Services/pre	Service is 'any' and application is 'any', so every protocol and port is permitted.	Set an application (App-ID) or a service object.
MEDIUM	Traffic is not logged NO_LOGGING	shared-services-pre-15	DG-Shared-Services/pre	Neither log-start nor log-end is set, so traffic matching this rule leaves no record.	Enable log-end so the traffic can be traced and the rule's usage assessed.
LOW	No description NO_DESCRIPTION	development-pre-20	DG-Development/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
LOW	No description NO_DESCRIPTION	dmz-pre-20	DG-DMZ/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.

SEVERITY	FINDING	RULE	LOCATION	DETAIL	SUGGESTED ACTION
LOW	No description NO_DESCRIPTION	partner-pre-09	DG-Partner/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
LOW	No description NO_DESCRIPTION	partner-pre-20	DG-Partner/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
LOW	No description NO_DESCRIPTION	production-pre-20	DG-Production/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
LOW	No description NO_DESCRIPTION	shared-services-pre-09	DG-Shared-Services/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
LOW	No description NO_DESCRIPTION	shared-services-pre-20	DG-Shared-Services/pre	The rule has no description, so its purpose cannot be established from the configuration alone.	Add the purpose, the requester and the change reference.
INFO	No change reference NO_TICKET	development-pre-05	DG-Development/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	development-pre-11	DG-Development/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	Expires soon EXPIRING_SOON	development-pre-16	DG-Development/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	No change reference NO_TICKET	development-pre-17	DG-Development/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	No change reference NO_TICKET	dmz-pre-05	DG-DMZ/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	dmz-pre-11	DG-DMZ/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	Expires soon EXPIRING_SOON	dmz-pre-16	DG-DMZ/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	No change reference NO_TICKET	dmz-pre-17	DG-DMZ/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	partner-post-01	DG-Partner/post	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	Expires soon EXPIRING_SOON	partner-pre-01	DG-Partner/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.

SEVERITY	FINDING	RULE	LOCATION	DETAIL	SUGGESTED ACTION
INFO	No change reference NO_TICKET	partner-pre-05	DG-Partner/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	partner-pre-06	DG-Partner/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	Disabled DISABLED_RULE	partner-pre-10	DG-Partner/pre	The rule is disabled and has no effect on traffic.	Delete it if it is no longer needed; disabled rules accumulate and obscure the active policy.
INFO	Expires soon EXPIRING_SOON	partner-pre-11	DG-Partner/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	No change reference NO_TICKET	partner-pre-13	DG-Partner/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	partner-pre-16	DG-Partner/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
INFO	No change reference NO_TICKET	partner-pre-17	DG-Partner/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	No change reference NO_TICKET	production-pre-05	DG-Production/pre	The description holds no recognisable ticket number, so the rule cannot be traced back to an approved change.	Add the ticket reference to the description.
INFO	Expires soon EXPIRING_SOON	production-pre-11	DG-Production/pre	The stated expiry is 2026-08-27, in 23 days.	Confirm whether the access is still needed before it lapses.
